# INCIDENT MANAGEMENT SITUATION REPORT FRIDAY, SEPTEMBER 8, 1995 - 0530 MDT NATIONAL PREPAREDNESS LEVEL II

#### \*\*\* SAFETY COMES FIRST ON EVERY FIRE, EVERY TIME \*\*\*

Current Situation: Moderate fire activity continued as new lightning and holdover fires were detected. Resource mobilization through NICC remained low.

# Northwest Area Large Fires:

CHELAN COMPLEX, Wenatchee N.F. A Type I Incident Management Team (Wands) is assigned. The complex consists of 5 fires, the largest being the Prince fire. Favorable weather conditions are assisting suppression efforts.

INCIDENT	UNIT ST	SIZE  %	EST	TOTAL	CRW	ENG	HELI	STRUC	EST	EST

OUTLOOK: An upper level low pressure system over the Northern Rockies will continue to slowly move eastward bringing cool and humid air to the area. High pressure will rebuild along the Northwest coast as the low pressure system departs. Monsoon moisture will continue over southern California, eastward over the southern Great Basin and the Southwest Area. The northern Great Basin will be dry with seasonable temperatures. High temperatures across the West will range from the 60's and 70's in the Pacific Northwest to 115 degrees in the Southwest deserts. Moderate fire activity is expected to continue. FIRES: Yesterday
